

Address Search Tips

Begin typing an address in the Search box and review the list of suggested addresses as you type. As you type, the list will become more focused on the address of interest. If the suggestions list no longer displays suggestions, there may be a problem with the address such as a missing or misplaced directional description, an invalid address number, or an invalid street name abbreviation. Here are some address formatting tips:

1) Addresses that contain a directional description are typically format E, W, N, S, NW, SW, etc. directly after the address number and before the street name. Be aware that there are county addresses where East, West, North, South, Northwest, Southwest, etc. may be part of the actual street name.

2) Here is a list of street name abbreviations that should be used when entering an address:

- | | |
|--|------------------------|
| a. County Road, County Rd – CR | Ex. CR 234 |
| b. Burnet County Road – BNRT CR | Ex. BRNT CR 322 |
| c. Private Road, Private Rd, Private – PVR | Ex. PVR 932 |
| d. Farm To Market – FM | Ex. FM 1105 |
| e. Ranch To Market – RM | Ex. RM 1869 |
| f. Interstate Highway, Interstate Hwy, Interstate – IH | Ex. N IH 35 |
| g. Highway, State Highway, State Hwy, Hwy – SH | Ex. W SH 29 |
| h. US Highway, US Hwy, Hwy – US | Ex. N US 183 |

3) Search for the street name without the address number to insure that the street name is valid and to confirm the address format.

Example: 301 SE Inner Loop (Georgetown, TX)

County Address Search

Begin typing an address below. As you type, a list of suggestions will be generated based on the characters entered.

Click on the address of interest for more detailed information.

Enter an Address

Begin typing an address and review the suggestions as you type for the address of interest.

Note: The list will be empty if the address is not found.
